A comparatively modest present,
but the good ones which I can give.

"Only who knows his past has a future."
Wilhelm von Humboldt (1767-1835)

Foreword

This book contains the facts, who, where, when, but not the story of our family. If you can add to our history or have an anecdote to tell, then please share it and help make our story come alive. Even little things, like your cousin the fisherman who didn't eat fish, will make our story more personal. If you can add to our story, please contact me! I hope to have at least a photo of everyone who is here. It is amazing how often there is a close resemblance for relatives separated by generations.

Introduction

The following pages list data for all known family members as of November 11, 2022.

Each immediate family is presented in their own section that contains a graphical family tree as well as a description with information about each referenced person and their children. The child section provides information about the children of the preceding couple. When a child has offspring of their own this is presented in a separate family section for that child. In this case a '+' is used to denote that an individual will appear later in the book as a parent with his/her own children and there is a link to the appropriate family reference number. For children with partners but no offspring the partner data is given with the reference family. Roman numerals, followed by a period, are used to indicate the birth order.

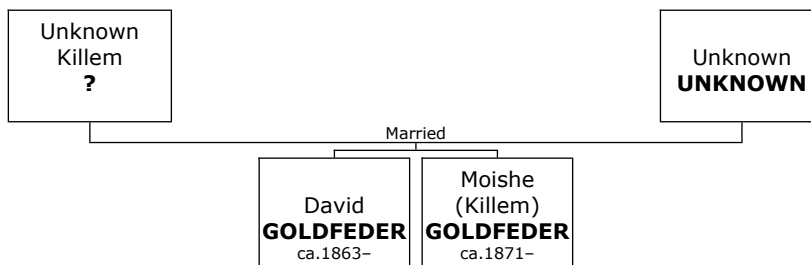

Sources for the information provided are given in the footnotes.

This document reports the details of 1881 individuals, of whom 980 are male and 896 are female. The sex of 5 individuals is unknown. Of the 209 individuals with recorded birth and death dates, the average lifespan was 70.6 years. Of these, 109 males averaged 69.1 years, and 100 females averaged 72.2 years. The longest living male was Marvin Tibbet STEIN (1921–2019), who died aged 98. The longest living female was Rose GREENBERG (ca.1854–1984), who died aged 130.
